

Duration: 46 Hours Theory and 44 Hours Lab

Objective: To perform advanced analytics using Python & R skills and important mathematical concepts.

Prerequisites: Good Knowledge of Basic Mathematics

Evaluation method: Theory exam– 40% weightage Lab exam – 40% weightage
Internal exam– 20% weightage

List of Books / Other training materials

Courseware:

Text Book:

1. Business Analytics, James R Evans, Pearson Education, 3rd Edition.

Reference:

1. Beginning R – The Statistical Programming Language by Dr. Mark Gardener PUB: WILEY
2. Art of Programming in R, by Norman Matloff
3. Statistics for Management by Levin
4. Business Analytics: Methods, Models, and Decisions by James R Evans
5. Introductory Statistics with R (Statistics and Computing) by Peter Dalgaard
6. R in a Nutshell by Joseph Adler (O'REILLY)
7. R Cookbook by Paul Teetor (O'REILLY)
8. The R Book, Second Edition
9. Statistics Using R, Shailaja Deshmukh, Sudha Purohit, Sharad Gore, Pub: Narosa

Session 1 & 2: (4T+4L)

Theory:

- Introduction to Analytics
- Data analytics Life Cycle
- Discovery
- Data preparation
- Model planning
- Model building implementation
- Quality assurance
- Documentation
- Management approval
- Installation
- Acceptance and operation
- Intelligent data analysis

Lab: Import csv file using R and perform ETL operation using dplyr package.

Session 3 & 4: (4T+4L)

Theory:

- Sample Spaces and Events
- Joint, Conditional and Marginal Probability
- Bayes' Theorem

Lab: Load any dataset, apply Bayes' Theorem and predict the output

Session 5 & 6: (4T+4L)

Theory:

- Random Variable
- Concepts of Correlation
- Covariance
- Outliers

Lab: Load any dataset and find out the covariance between two fields and also find the correlation and determine how two fields are correlated. Also handle the outliers in the data.

Session 7 & 8: (4T+4L)

Theory:

- Probability Distribution and Data
 - ▣ Continuous distribution – (Uniform, Exponential & Normal) ▣ Discrete distribution – (Binomial, Poisson & Geometric distribution)

Lab: Generate random numbers and check if they are in normal distribution using scipy libraries.

Session 9 & 10: (4T+4L)

Theory:

- Descriptive Statistical Measures
- Summary Statistics - Central Tendency & Dispersion (Mean, Median, Mode, Quartiles, Percentiles, Range, Interquartile Range, Standard Deviation, Variance, and Coefficient of Variation)

Lab: Load any dataset and find out the mean, median mode and other central tendencies of the dataset.

Session 11 & 12: (4T+4L)

Theory:

- Sampling and Estimation
- Sample & population, Uni-variate and bi-variate sampling, re-sampling
- Central Limit Theorem

Lab: Load any dataset and Explore sampling techniques.

Session 13 & 14: (4T+4L)

Theory:

- Statistical Inference Terminology (types of errors, tails of test, confidence intervals etc.)
- Hypothesis Testing
- Parametric Tests: ANOVA, t-test
- Non-parametric Tests- chi-Square, U-Test

Lab: Load any dataset and Perform the hypothesis testing on correlated variables.

Session 15 & 16: (4T+4L)

Theory:

- Predictive Modelling (From Correlation to Supervised Segmentation):
 - Identifying Informative Attributes,
 - Segmenting Data by Progressive Attribute,
 - Models,
 - Induction and Prediction
 - Supervised Segmentation
 - Visualizing Segmentations
 - Trees as Set of Rules
 - Probability Estimation

Lab: Explore predictive modelling techniques.

Session 17: (2T+2L)

Theory:

- Simulation and Risk Analysis
- Optimization, Linear

Lab: Explore Monte Carlo simulation.

Session 18 & 19: (4T+4L)

Theory and Lab:

- Decision Analytics:
 - Evaluating Classifiers
 - Analytical Framework
 - Evaluation
 - Baseline
 - Performance and Implications for Investments in Data

Session 20 & 21: (4T+4L)

Theory and Lab:

- Evidence and Probabilities
 - Explicit Evidence Combination with Bayes Rule
 - Probabilistic Reasoning

Session 22: (2T)

Theory:

- Business Strategy:
 - Achieving Competitive Advantages
 - Sustaining Competitive Advantages

Session 23: (2T+2L)

Theory:

- Factor Analysis
- Directional Data Analytics

Lab: Download dataset and perform factor analysis on it.
